Re-Grip Special

Should you be **custom fitted**?

Yes! Grips that are too thin will make your hands too active through the hitting area. Too large and you will struggle to square up the clubface.

There are three aspects to a golf club – the head, the shaft and the grip. All of these need to be correct for your swing.

In the hot South African weather, a golfer who plays once a week should change his grips on an annual basis. It's also good to clean them with soap and water and a brush, regularly. Also, do not keep your golf clubs in the boot of your car – especially in the heat!

Hybrids...

At last stats prove that hybrids are more accurate than **long-irons**.

If you hit the ball 160 – 180 metres, you are 29% more likely to hit the green with a hybrid. From 180 – 200 metres, that percentage increases to 71%.

Another benefit is that you will get a higher trajectory, longer carry and increased spin.

Product of the Week

Limited edition Scotty Cameron Concept-X Putter available at **R8999**.

FINDING THE PUTTER FIT FOR YOU

Making more putts, reducing three-putts, has a direct impact on your scorecard.
Find a putter that best suits your technique and the conditions of the courses you play.

Putters can be adjusted to fit your exact putting technique, specifications, and preferences to ensure you make more putts more easily.

STOP GUESSING

What you think you're doing wrong versus what you're actually doing wrong is probably skewed.
Let us improve your putting.
