

Gate access: *please could we request that all Zwartkop members; visitors and staff use the right-hand lane for access into the club so that we can conduct Covid screening.*

Course work is on the go!

There is a buzz of activity taking place on the golf course.

Here are some pics to keep you in the loop:

Top row from left – three sluits being constructed on the 17th fairway; soil piling up to start work on the 12th green; ongoing river rubbish collection.

Middle row from left – sluit construction on the 11th fairway – work has also been done on the 13th fairway.

Bottom row from left – filling in the pond at the 16th.

No more slice
Not 'right' from the off?

Last time out, if too many holes were spoiled right from the off, by a slice or big fade off the tee that results in you being in the rough or trees, then the good news is that it's often an easier fix than you think.

“The club face angle of the driver at impact, vs. swing path, has a much bigger influence on where your ball ends up, than with any other club.”

No more slice

Finding the fairway off the tee makes the rest of the hole so much more enjoyable. If losing the ball to the trees or rough because a slice or fade ruins too many of your holes, then let's change that right now.

Join our Masterclass >

Play like you're
one shot closer to the green

Imagine playing every approach with one club less. The A.I. face design on the Srixon ZX4 and ZX5 Irons means you don't have to imagine. You can experience it. But which of these two ZX Iron models is right for you?

Set your foundation
More power is a process

Your golf swing has more power potential than you think. To develop that power, you need a strong foundation of mobility. How mobile are you? A swing assessment can tell us a lot.

[Swing assessment >](#)

“Improving your mobility might not sound as exciting as increasing power. But if you bypass mobility training, you’re more likely to limit your range of motion and get injured than you are to improve your swing and hit it further.”

Being able to move through all three planes of motion is the foundation of mobility.

The three planes of motion are:

- Sagittal plane: forward and backward movements.
- Frontal plane: side-to-side movements.
- Transverse plane: twisting movements.

[Learn more >](#)

Have you tried yoga?

The massive variety of poses in yoga take your body through all the planes of motion, making a huge difference to your overall mobility.

Build a strong foundation

A swing assessment can help us identify any areas where you might be restricted. Then we can decide whether a change in technique or a recommended visit to a physical trainer or both, would be best for you.
