With a setting like this...

Who would want to be anywhere else? One positive thing that the recent bad weather has brought with it, is beautiful sunsets.

Course update

Our members are back playing golf, but we still have a lot to do to get our course back to where it was before the floods.

Greens

The 13th green will be replanted next week. Unfortunately we haven't been able to get any good bent grass sods, so we will be using a side of the putting green for the extra grass we require. Once fixed you won't even notice that the putting green is a teeny bit smaller.

All the other greens that were affected by the flood will be given a single hollow-tine on Monday and along with that we will be inter-seeding and sanding them.

Fairways

We have ordered 10,000 sqm of kikuyu sod and this will be used on the fairways of holes 5, 7, 9, 11 and 13.

Bunkers

We have filled in the bunkers that get the most damage from flooding.

These are specifically the one at the back of the 4th green, the little pot bunker at No. 10, the bunker to the right of the green at the 11th and the left back bunker at No. 16. These will all be covered by kikuyu.

Tee Markers

We have already installed the new tee markers which are hopefully floodproof!

Friendly reminder to

Repair your pitchmarks

Please help us to repair pitch marks, especially while we are doing everything we can to restore our greens and fairways.

Further down the fairway

Why sacrifice accuracy for distance?

Longer drives can shorten your approach and improve your playing experience. But that's only if you're hitting the fairway. Did you know that golfers with a handicap of 16 or higher are hitting just 40% of the fairways?

Here's how we go about setting you up for both distance and accuracy off the tee.

Go longer AND straighter

Once we've identified the correct driver head and shaft for you, we'll finetune your setup based on your swing, making it easier for you to find more fairways and extra metres off the tee.
