Duca del Cosma

Duca del Cosma shoes are bright, stylish and comfortable. They are designed in Venice, Italy and made in Portugal. If you are in the market for new golf shoes, remember the name Duca del Cosma.

'HERE'S WHY I CHOSE **DUCA DEL COSMA** SHOES: POWER COMES FROM STABILITY'

Six-time European Tour Champion **Joost Luiten**

- Golf shoes are the foundation of a good swing and are as important as custom clubs if you want to play your best golf.
- Since the golf swing is an unnatural movement, it requires shoes that are fit for purpose time and time again.
- Duca shoes may not be the lightest, because they are handcrafted to place weight where it can deliver maximum performance benefits.
- Stability is the key criteria built into the Duca shoe to help players at all levels increase traction and minimise fatigue.
- Too much flexibility and lightness in a shoe can prove a negative when dealing with so much pressure on your feet during the swing.

Find your feel-good flatstick

Your putter can reward and rescue you, it can give you some of your most memorable moments on a golf course. But you'll need a fitted flatstick that's up to the task.

Regardless of what's happened on your way to the green, putting can ensure you walk off the hole with a smile instead of a scowl. But first, we'll need to find the putter that works best for you. One of the most important elements is putter head weighting. Depending on your putting arc, you may benefit from a face-balanced or toe-hang putter. The only way for us to know for sure is with a putting assessment and fitting. Great approaches should be rewarded with more holed putts.

[Book a putter fitting](#)

Putting makes up almost half of the total number of shots you play during a round. It's no wonder then that better putting leads to lower scores and an improved playing experience.

More memories on the putting green

Once you're putting with a fitted putter and a consistent, repeatable putting stroke, you're going to save shots and have more fun.

Let's find your Z-STAR

Whether you prioritise feel and spin, or distance and speed, or all of the above, there's a Z-STAR Golf Ball that's going to help you reach your full potential. All we need to do is decide which one suits you best.

Make your own luck

Distances that make the difference

Last week, we spoke about the importance of knowing your best and average distance for every club in your bag. And when it comes to par 3s, there are three more distances to consider if you want to make your own luck and hit more greens.

Once you've noted the danger (bunkers and water), the wind direction and strength, and the elevation to the green, note the following three distances from the tee box:

Distance to the front of the green.

Distance to the pin.

Distance to the back of the green.

A recipe for luck

Know all your distances. Observe course conditions. Practise like you play. Develop a repeatable swing. Check all those boxes and you're effectively making your own luck!

A happier, luckier playing experience

If there's any area of your game that you're struggling with, we're here to help. The best way to improve your experience is with an assessment, a lesson or playing a few holes together, or all of the above.
